Wednesday, 7 September 2011

Athlete's Ankle

Acute ankle instability in the athlete's ankle: Current concepts on diagnosis & treatment	C.N. van Dijk (Netherlands)
Syndesmotic and medial instability	James Calder (United Kingdom)
Chronic Ankle Instability: Current state of the art	C.N. van Dijk (Netherlands)
Achilles Tendinopathy: Current insights in management	Giuseppe Longo (Italy)
Achilles Tendon Ruptures: Current state of the art	James Calder (United Kingdom)
Achilles Tendon reconstruction after failed primary treatment	Giuseppe Longo (Italy)
OCD	Milan Handl (Czech Republic)

Hip Arthroscopy: Basic Concept, Current Indications and Future Perspective

Chairmen: Jacques Menetrey (Switzerland) & Nicolas Bonin (France)

Arthroscopic Anatomy and Portal Placement	Vikas Khanduja (United Kingdom)
FAI: Concept, Pathology and Treatment Options	Nicolas Bonin (France)
Labral Management: Debridement or Repair	Filippo Randelli (Italy)
Chondral Lesions: what can I do?	Hassan Sadri (Switzerland)
The Internal and External Snapping Hip	Filippo Randelli (Italy)
Arthroscopy and Total Hip Arthroplasty	Hassan Sadri (Switzerland)
Arthroscopy and Hip Traumatology	Raul Zini (Italy)
Future perspective?	Vikas Khanduja (United Kingdom)
Conclusion = tricks and pearls to bring home	Jacques Menetrey (Switzerland) & Nicolas Bonin (France)

At the completion of this symposium, the participants will have a good overview on hip arthroscopy from the basic concepts and present current indications to the possibilities nowadays. They should understand portal anatomy for hip arthroscopy, femoroacetabular impingement concept and treatment, management of labral and chondral injuries as well as treatment of snapping hip. They should learn about the future perspective in hip arthroscopy.
